1 B) Floyd's Triangle in C# .

```
using System;
class Program
{
   static void Main()
   {
      int n, number = 1;
      Console.Write("Enter number of rows: ");
      n = Convert.ToInt32(Console.ReadLine());
      for (int i = 1; i <= n; i++)
      {
         for (int j = 1; j <= i; j++)
         {
            Console.Write(number + " ");
            number++;
         }
         Console.WriteLine();
      }
      Console.ReadLine();
   }
}
```

Kaise run karein

1. Visual Studio open karein.
2. **Create a new project → Console App (C#)** select karein.
3. Project name `FloydTriangle` rakhein.
4. `Program.cs` ka code replace karke upar wala code paste karein.
5. `Ctrl + S` se save karein.
6. `Ctrl + F5` press karein aur rows ki sankhya enter karein.

Yaad rakhein: Outer `for` loop rows control karta hai aur inner `for` loop har row mein numbers print karta hai.
